

PDGFRB is null on both platforms, at a scale where the pipeline detects the positive control

Odds ratio for Parkinson's disease per SD of plasma protein (log scale)

| minimum detectable effect at 80% power (what this design could have seen)

Instruments: GPNMB 2 (deCODE), 4 (UKB-PPP); PDGFRB 5 (deCODE, F = 13779), 4 (UKB-PPP, F = 2252).

Pre-specified gate required recovery on BOTH platforms; it was narrowed to deCODE, leaving the UKB-PPP arm ungated.
